

## Huntington's Chairs & Beds

Delivering the best quality and comfort in our tilt and lift chairs and electric beds in Australia

# novacorr Huntington's Chair

The Novacorr Huntington's Chair has been developed in conjunction with Wesley Neurological Support Services (Melbourne, Australia). It is a world first in providing both safety for the clients and durability of the equipment.

The unique positioning system provides support and comfort and does not allow the user to slide out of the chair.

The Novacorr Huntington's Chair lifts vertically allowing carers to transfer the client or fit slings without bending their backs.

Not only does the chair address the needs of clients and carers, it looks like a 'normal' lounge chair and comes in a range of colours - chosen by clients to match their taste or décor. The covers are wipeable and removeable for washing - a second set of covers is provided with each chair.

- > Fully electric and unique positioning system
- > Anti sheer fabric
- > Waterproof fabric
- > Removable covers
- > Heavily padded arm rest for client safety
- > Adjustable groin harness
- > Fire retardant fabric
- > Pressure prevention foams to seating and foot area

# novacorr Huntington's Bed

The Novacorr Huntington's Bed (patent pending) is a fully adjustable hospital bed with electrically controlled padded protective side rails. The side rails have a range of 350mm - from 90mm below the height of the mattress (in the raised position) to 460mm above.

Use of the positioning system and padded side rails provides a safe sleeping environment. The HiLo function allows for the client to be cared for on the bed and transferred without risk to clients or carers.

Like the Novacorr Huntington's Chair the rounded edges of the bed further enhance the 'domestic' look.

These beds have an actuator system from Linak (Denmark) or Dewart (Germany). Both systems have been tested and proved to resist the stress that occurs with clients who have chorea.

The Novacorr Huntington's Bed has been developed with help from the Occupational Therapy team at Wesley Neurological Support Services in Melbourne, Australia.

- > Hoist clearance 140mm
- > No pinch points
- > 4 section bed
- > Unique positioning system
- > Safe sleeping environment
- > Anti sheer waterproof mattress protector
- > Pressure prevention mattress
- > Fire retardant materials
- > Electric adjustable padded/protective side rails

**Novacorr Healthcare is a family-owned and operated company with clients from all over Australia. Our passion is to help clients find solutions for their everyday needs. That may well be as easy as custom designing a bed or chair or fitting a stairlift in your home.**

Novacorr will continue to invest hundreds of man-hours each year in research and development, which has helped build our reputation throughout the healthcare industry. We see ourselves as problem solvers and work with Occupational and Physiotherapists on a daily basis. Working with spinal injuries, cerebral palsy, and bariatric clients and have developed products for people with neurological conditions such as Parkinson's, MS, Muscular Dystrophy and Motor Neuron Disease. Novacorr Healthcare's passion to help has benefited our growing list of clients.
